## EUROPEAN PATENT SPECIFICATION

(45) Date of publication and mention  
of the grant of the patent:  
31.10.2001 Bulletin 2001/44

(51) Int Cl.7: A61K 35/74, A61K 9/00,  
A61P 15/02

(21) Application number: 98830264.2

(22) Date of filing: 30.04.1998

(54) Pharmaceutical compositions containing *Lactobacillus brevis* and *Lactobacillus salivarius* for  
treatment of vaginal infections

Pharmazeutische Zusammensetzungen enthaltend *Lactobacillus brevis* und *Lactobacillus salivarius*  
zur Behandlung von Vaginainfektionen

Compositions pharmaceutiques à base de *Lactobacillus brevis* et de *Lactobacillus salivarius* pour le  
traitement d'infections du vagin

(84) Designated Contracting States:  
AT BE CH DE DK ES FI FR GB GR IE IT LI LU MC  
NL PT SE  
Designated Extension States:  
AL LT LV RO SI

(43) Date of publication of application:  
17.11.1999 Bulletin 1999/46

Note: Within nine months from the publication of the mention of the grant of the European patent, any person may give notice to the European Patent Office of opposition to the European patent granted. Notice of opposition shall be filed in a written reasoned statement. It shall not be deemed to have been filed until the opposition fee has been paid. (Art. 99(1) European Patent Convention).

Examples 10 to 15

[0058] Examples 4 to 9 were repeated following the same modalities as specified in said Examples respectively, with the only difference that a microbic-culture lyophilized product was used (concentration  $1 \times 10^{10}$  CFU/g) which consisted of *L. brevis* ATCC 14869, *L. salivarius* subs. *salicinicus* ATCC 11742 and *L. gasseri* ATCC 9857 species in a 1:1:1 ratio.

5 [0059] All pharmaceutical preparations obtained in Examples 4 to 15 have proved to be very efficient in treating patients suffering from vaginosis and vaginitis.

10 **Claims**

1. Use of an association of lactobacilli of the *Lactobacillus brevis* and *Lactobacillus salivarius* subs. *salicinicus* species for preparation of a pharmaceutical composition to be employed through vaginal administration for treatment of vaginosis and vaginitis.
- 15 2. A use as claimed in claim 1, in which said association of lactobacilli comprises one or more species of lactobacilli selected from *Lactobacillus salivarius* subs. *salivarius*, *Lactobacillus jensenii*, *Lactobacillus catenaforme*, *Lactobacillus minutus* and *Lactobacillus gasseri*.
- 20 3. A use as claimed in claim 1, in which said association of lactobacilli consists of the *Lactobacillus brevis*, *Lactobacillus salivarius* subs. *salicinicus* and *Lactobacillus gasseri* species.
4. A use as claimed in one or more of the preceding claims, in which said association of lactobacilli is employed at a concentration of  $10^7$  to  $10^{13}$  CFU/g.
- 25 5. A use, as claimed in one or more of the preceding claims, in which the pharmaceutical composition is prepared in a liquid form, in the form of creams or ointments, or in a solid form, as pessaries or vaginal tablets.
- 30 6. A use as claimed in claim 5, in which the pharmaceutical composition is prepared in the form of tablets comprising at least two layers, both containing said species of lactobacilli, bound with usual excipients and additives, so that the release velocity of bacteria of the outermost layer is greater than the release velocity of bacteria of the innermost layer.
7. A pharmaceutical composition to be used through vaginal administration for treatment of vaginal infections, comprising an association of lactobacilli of the *Lactobacillus brevis* and *Lactobacillus salivarius* subs. *salicinicus* species.
- 35 8. A composition as claimed in claim 7, in which said association of lactobacilli also comprises one or more species of lactobacilli selected from *Lactobacillus salivarius* subs. *salivarius*, *Lactobacillus jensenii*, *Lactobacillus catenaforme*, *Lactabacillus minutus* and *Lactobacillus gasseri*.
- 40 9. A composition as claimed in claim 7, in which said association of lactobacilli consists of the *Lactobacillus brevis*, *Lactobacillus salivarius* subs. *salicinicus* and *Lactobacillus gasseri* species.
10. A composition as claimed in one or more of claims 7 to 9, in which said association of lactobacilli is employed at a concentration of  $10^7$  to  $10^{13}$  CFU/g.
- 45 11. A composition as claimed in one or more of claims 7 to 10, in a liquid form, in the form of creams or ointments, or in a solid form, as pessaries or vaginal tablets.
- 50 12. A composition as claimed in claim 11, in the form of tablets comprising at least two layers, both containing said species of lactobacilli, bound with usual excipients and additives, so that the release velocity of bacteria of the outermost layer is greater than the release velocity of bacteria of the innermost layer.
